MY PROJECTS

NETFLIX CLONE

- The purpose of this project is to learn CSS and CSS media queries. Mainly responsiveness. Because Responsiveness is most important part in development. So When I Make this project It is very tough to understand the grid system and flexbox, But at the end of this project. When I solve all the queries. Then gradually at the end of the project i am able to understand css flexbox and grid system very nicely.

AMAZON CLONE

- The purpose of this Amazon clone is to learn the java script DOM document object model because it is very important for frontend developer to learn dom. it is very attractive when i used Dom a little bit in my amazon clone and also i try to learn more about media queries. this clone gives me a better understanding of CSS and html also.

PINTEREST CLONE

- The purpose of this Pinterest clone is to learn the TAILWIND CSS this framework is very close to the Vanilla CSS and I am able to develop whole website just using tailwind classes it is very nice framework and it is very easy to use. it is solved my all-responsiveness queries and gave me a full control with 0 CSS code only used html and tailwind CSS classes.

FITNESS FREAK WEBSITE

- The purpose of this website is to learn the bootstrap. in this project i am able to do collab with my friend so this is easy just simply copy whole bootstrap tools like navbar, footer, contact, carousel, etc. this clone is also solved my responsiveness queries. and it is also the project which gave in my envision institute.
